

Startin

- Go to the Effects pane in the content overview -> Keying -> Ultra Key
- Go to Effects in the source control Window -> Chose a colour to remove
- Change setting to set how much of the adjacent colours to remove

Work

Get videos to experiment with

- **THE FOLLOWING IS NOT STRICTLY LEGAL!!!**
 - But very useful
- Download videos from Youtube
 - You can use the following plugin script for Firefox
 - <https://github.com/gantt/downloadyoutube>
 - There are dozens of other options out there
- Once you have some videos you can start experimenting!

Work

- Fill out as much as possible* of the empty space in the middle of today's video
 - Show it to me
- *10 seconds is NOT enough, use more clips - there is plenty of green-screen clips on YouTube
- Or do something fully different - just keep the music
